Green Pitch pitches into 2011 with an explosion of an ep.

The five songs on "Asleep" once again prove Green Pitch's ability to uncover melancholia in amazingly beautiful singer/songwriter inspired pop melodies.

"Asleep" is the first of 3 ep's that Green Pitch will release this year. The next ep "Awake" will already be hitting the streets in late may, and the third and final ep is coming out this fall.

Since the critically acclaimed album "La Jolla" was released in 2009, Green Pitch has gone through great change. From being a duo consisting of the couple Ste & Rex Garfield, Green Pitch has now become a complete band with 4 members.

The guitarist and multi-instrumentalist Reno Rasmussen and the cello player Ronni Bjørnum Bengtsson have been invited to join in, and they now take part in giving Green Pitch a much more full expression, especially when the band is playing live.

On "Asleep" one can easily sense that the band has become more united than earlier, but the songs are just as beautiful and longing, dreamy and sad as always.

The touring the band has done in Germany and Switzerland since "La Jolla" hit the streets, has strengthened them and given them a joy of playing that is contagious and that involves the listener.

"Asleep" is without a doubt Green Pitch's strongest release to date, and a brilliant beginning of the trilogy.
