It all started with two cool DIY EP's, and now – in the summer of 2009 – the band have just grabbed the prestigious 'Band Of The Year' award at the Danish Music Critics' Award show, and in May they did a brief tour of Germany as special guests to Bat For Lashes.

In a mix between the gentle and the explosive, alternative/electronic act Marybell Katastrophy has found their niche. It might be electro-pop, but not as we (usually) know it.. Their music is to be found somewhere in the landscape between Johannes Brahms, Pixies and David Bowie. Being quite difficult to describe, critics have compared the sound of Marybell Katastrophy to everything from The Bangles on acid, to Kate Bush turned upside down... (sic!)

The debut full-length album - The More – was released in Denmark on 24 November 2008. 15 songs, showing the wonderful, experimenting, playful and distorted world of Marybell Katastrophy. And again the critics loved it.

According to major papers Information and Urban, The More was 'album of the year' in Denmark. The Danish National Radio nominated Marybell Katastrophy as 'Experiment Of The Year', in their 'P3 Gold' award show.

Marybell is basically a duo, consisting of Marie Højlund (ex. Tiger Tunes) and Emil Thomsen (Schweppenhäuser), but on stage they're usually aided by 3 – 5 musicians. They have previously toured Germany, France, England and Ireland. And they have played big festivals; Roskilde Festival 2007 and the grand opening show at the Spot Festival (Danish answer to South By Southwest) in June 2007.

Next step is a tour of Europe in November + December 2009
